

Compass update no. 45

In this bulletin you will find the following articles:

- Auto Rollover of NPE/NPEE
- Contract Allocation Form (England only)
- Provider contract changes made in 2017/18 (England only)
- New Report – Location Use
- NHS Dental Services User Forums
- New FP17, FP17O for England and the FP17W and FP17OW for Wales

Auto rollover of NPE/NPEE

The following message has been sent to the Business Owners of the contracts impacted by the auto rollover process. To identify the contracts impacted please run the new 'Contracts where NPE/NPEE Ceiling Exceeded' report located in the Data Cleanse folder within the reporting folder on Compass.

Important – Action Required - Auto rollover of NPE/NPEE

At the end of the financial year the performer NPE/NPEE for the current year in Compass is rolled over to the following financial year. For any performers who started part way through the year the value for the month of March is pro-rated up to the full year amount for the next year. If the value for March is not accurate then this pro-rating can artificially inflate the value for the year and can mean that the Pensionable Ceiling is exceeded and performers may pay large amounts of pension contributions.

One or more of your contracts have been affected and the pensionable Ceiling for 2018/19 has been exceeded, please therefore review the Performer NPE/NPEE for 2018/2019 and amend to the correct annual value and submit the changes to your local office or Health Board as soon as possible.

Contract Allocation Form (England only)

With the agreement of NHS England and the Finance User Group the Contract Allocation Form and Contract Allocation Form (CAF) have now been combined as one form, this new form together with some guidance has now been posted on the Compass Help and Guidance pages of our website.

Provider contract changes made for 2017/18 (England only)

A number of providers are changing the 2017/18 NPE/NPEE values for Performers via the Contract Amend functionality in Compass. We would advise that you reject these changes and inform the Provider that 2017/18 changes to NPE/NPEE should be carried out via the Annual Reconciliation Report (available to Providers on

Compass from 3rd April 2018). Providers will also be advised of this via the Dentists Bulletin.

New Report - Location Use

A new report called 'Location Use' has been added to your reporting folder, this allows you to enter either the post code or location id and view where the address is being used.

NHS Dental Services User Forums

We are arranging user forums to cover all work streams of NHS Dental Services rather than specific to Compass. It is intended that they will take place from mid to end June 2018. Further details will be provided soon.

New FP17, FP17O for England and the FP17W and FP17OW for Wales

Changes to the FP17, FP17O for England and the FP17W and FP17OW were introduced at the start of April

FP17 and FP17O

There has been a change to the colour of these forms and they are now orange and the information on the front of the forms has been rearranged slightly. On the back of the forms there are now boxes to enter the patient's email address and / or mobile phone number.

FP17W and FP17OW

As with the English forms the colour of these forms has changed to orange

The front of the FP17W now has the addition of CDS items to part 5a including Risks from Medical History, Social History and Dental History, Tooth Decay, Dentinal Decay, Periodontal Health and Other Dental Need.

The changes to the FP17OW are the same as those to the FP17O.
