

Compass update no. 48

In this bulletin you will find the following articles:

- Performer audit log
- Deleting performer tenures
- SFE Leave
- Hints and Tips
- Contract Service History
- Mandating Electronic Submission of Dental Activity Claims

Performer audit log

We have added a new XQuery report called 'Performer Audit Log' to the Performer Folder within Compass. This will provide you with a history of who has created and/or amended performer details. Simply enter the performer number and select execute.

Deleting performer tenures

Some new validation has been introduced into Compass which will prevent the deletion of a performer tenure if FP17 claims have been received for the period of the tenure. The claims will either have to be deleted to allow the deletion of the tenure or the tenure will have to remain in place if the claims were legitimate.

SFE Leave (Maternity, Paternity or Adoptive Leave and Long Term Sickness)

If a performer is on Maternity, Paternity or Adoptive Leave or is claiming Long term Sickness Payments, the performer's NPE/NPEE should not be zeroed for the period of absence via Contract Amend as this will impact on the calculation of their payment and could impact on their pension contributions.

When NWSSP receives the application form and the claim is entered into Compass, the system will use the NPE/NPEE value to calculate the payment due and automatically zero their earnings for the period of absence.

Hints and tips

Please be advised that wherever you see a blue question mark  within Compass, if you click on it, a pop up box will appear that will provide you with a hint or tip as to what information is required, and where appropriate, it will include a hyperlink to our Ask Us facility that will provide further details such as in the example below;

Form Status

Contract Service History

Many users have reported that they find the history pages difficult to interpret because they span more than one page, just a reminder that there is a report that provides a more compact and printable version of all the financial information relating to a contract service lines, Performer NPE/NPEE and Payment Adjustments. This report called 'Contract Service History' can be located in the Contract folder.

Mandating of Electronic Submissions of Dental Activity Claims

In October 2017, a change to regulations was laid before the National Assembly for Wales to support the submission of electronic claims.

From the 1 May 2019 new courses of dental treatment will only be accepted by **electronic submission**. The currently available paper FP17W and FP17OW forms will be withdrawn along with the Welsh language versions of the forms (FP17Ww and FP17OWw).

In preparation for this, the NHSBSA have developed an online FP17W and FP17OW that can be created by the Performer or Practice Manager in the Compass system as a direct replacement for the paper forms.

The Compass screens for Online FP17W and FP17OW transmission replicate the sections of the paper forms and build on the existing screens used for correcting paper forms in error. Patients will be required to sign a FP17PRW (patient declaration) the same as practices submitting via EDI.

The NHSBSA are currently trialling the online FP17 and FP17O with a number of practices that submit using paper, before making it more widely available. Initial feedback from the participating practices is that the system is easy to use, it reduces errors and they are impressed by the speed of which claims are validated and viewable which is almost immediate.

Please note that this has no impact on the Practice Management Systems currently available.

For reference, the relevant regulations can be found using the link below
